

## Dumbest DC Theories That Turned Out to be Actually True

### Alfred is The Joker

([https://dc.fandom.com/wiki/Alfred\\_Pennyworth\\_\(New\\_Earth\)\)](https://dc.fandom.com/wiki/Alfred_Pennyworth_(New_Earth)))

#### Alfred is The Joker.

If you ever wondered why a billionaire orphan keeps a middle-aged butler around, some fans said it was because Alfred was secretly moonlighting as a homicidal clown to keep Bruce from getting bored.

This theory was widely considered the peak of internet insanity because it implies Alfred spends his weekends murdering city officials and blowing up hospitals just to make sure his employer gets enough cardio.

It felt like a massive stretch until Neil Gaiman decided to write a love letter to the Batman mythos called *Whatever Happened to the Caped Crusader?*

([https://dc.fandom.com/wiki/Batman:\\_Whatever\\_Happened\\_to\\_the\\_Caped\\_Crusader%3F](https://dc.fandom.com/wiki/Batman:_Whatever_Happened_to_the_Caped_Crusader%3F))

In this story, the Batman universe gathers for Bruce's funeral, and Alfred steps up to the podium to drop a bombshell that would make any therapist retire on the spot.

(Batman's funeral <https://readcomiconline.li/Comic/Batman-1940/Issue-686?id=23929>)

He explains that when Bruce first started his crusade, Gotham was actually too quiet, and the young master was slipping into a deep, dark depression because he had no one to punch.

To save Bruce's sanity, Alfred used his old acting skills to apply some greasepaint and became the Joker, hiring his theater friends to play the rest of the rogues' gallery like Riddler

([https://dc.fandom.com/wiki/Edward\\_Nashton\\_\(New\\_Earth\)\)](https://dc.fandom.com/wiki/Edward_Nashton_(New_Earth))) and Penguin

([https://dc.fandom.com/wiki/Oswald\\_Cobblepot\\_\(New\\_Earth\)\)](https://dc.fandom.com/wiki/Oswald_Cobblepot_(New_Earth)))).

(Alfred becoming Joker <https://readcomiconline.li/Comic/Batman-1940/Issue-686?id=23929>)

What makes it even crazier is that the story treats this as a beautiful act of fatherly devotion rather than a massive series of war crimes.

It turns out that the best way to handle a grieving billionaire is to gaslight him into a lifelong war against a figment of your own imagination.

Apparently, some butlers provide tea and crumpets, **while others provide a lifelong history of psychological trauma and chemical warfare.**

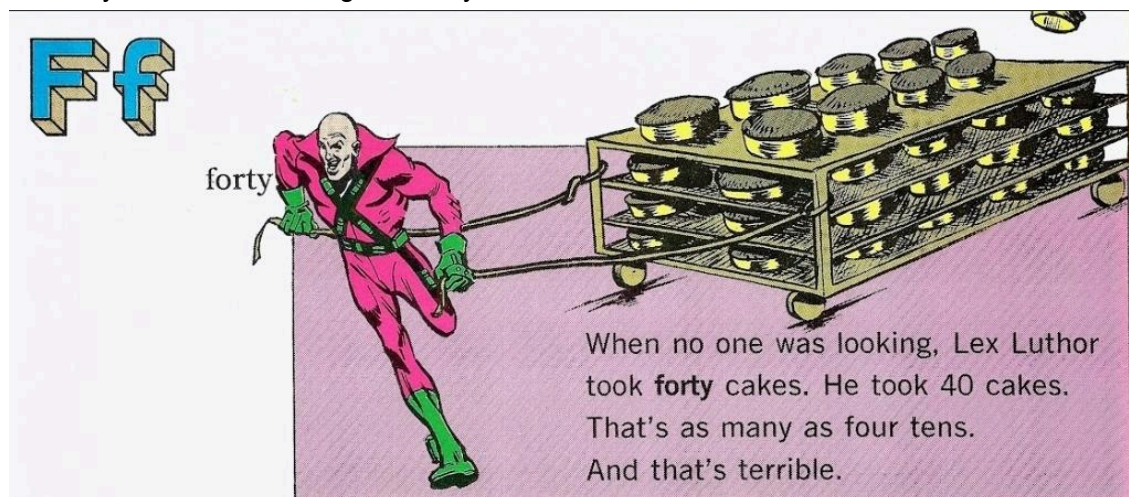

### Lex Luthor Stole 40 Cakes

([https://dc.fandom.com/wiki/Alexander\\_Luthor\\_\(New\\_Earth\)](https://dc.fandom.com/wiki/Alexander_Luthor_(New_Earth)))

#### Lex Luthor Stole 40 Cakes.

Lex Luthor is a man who wants to rule the world and kill God, but he once took time out of his busy schedule to commit what I call the most pastry-heavy heist in human history.

Back in 1978, a vocabulary book (<https://readcomiconline.li/Comic/The-Super-Dictionary>) for children claimed that Lex Luthor stole forty cakes from a school cafeteria, which was famously described as being "as many as four tens."

(Lex stealing forty cakes in the children's book

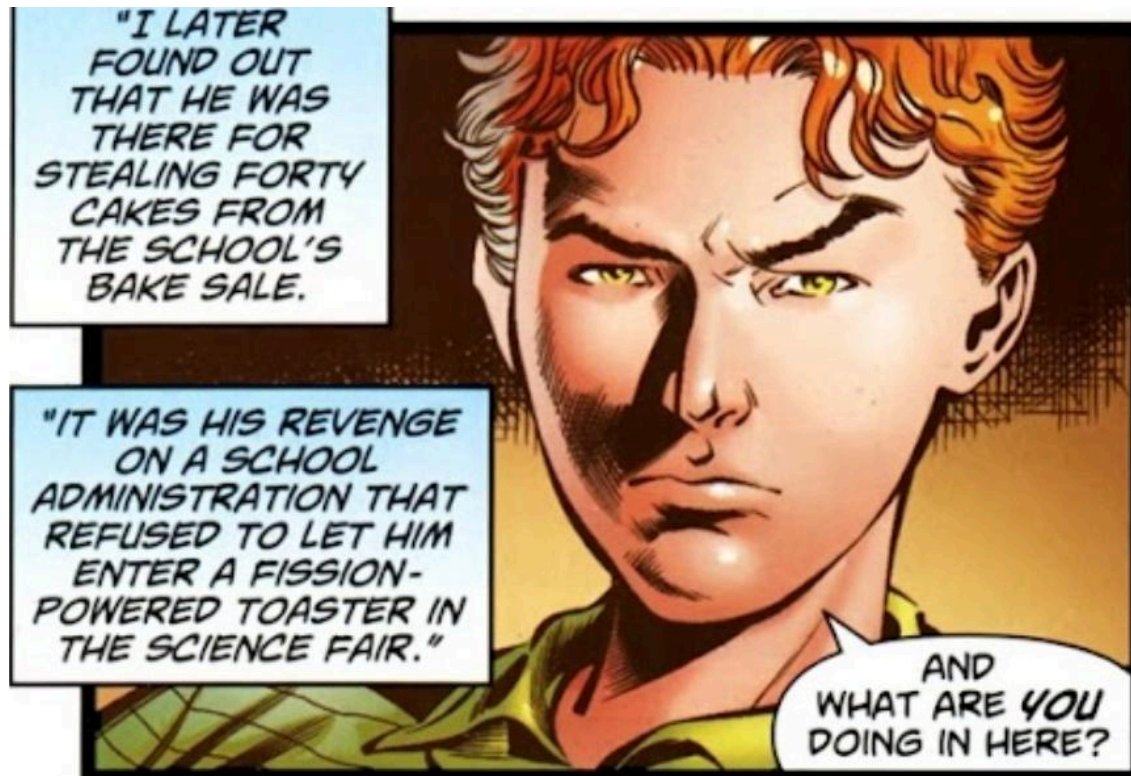

<https://readcomiconline.li/Comic/The-Super-Dictionary/TPB-Part-2?id=176932>)

This became a legendary internet meme because it portrayed a genius billionaire as a petty thief who has a very specific and inexplicable vendetta against dessert.

Fans spent years laughing at the idea that this was a canon event, assuming it was just a weird mistake made by a confused dictionary illustrator.

However, in 2011, DC decided to reward the internet's obsession by making the cake heist a formal part of Lex's backstory.

In a flashback ([https://dc.fandom.com/wiki/Superman\\_Vol\\_1\\_709](https://dc.fandom.com/wiki/Superman_Vol_1_709)) to his teenage years, a young and bitter Lex is revealed to have actually stolen 40 cakes because he felt slighted by a science fair project.

(Add this and maybe highlight the “stealing forty cakes” part

<https://readcomiconline.li/Comic/Superman-1939/Issue-709?id=16423>)

The writers took a "dumb" children's book error and turned it into a definitive character trait, showing that Lex is so petty he will ruin a bake sale just to feel powerful.

It shows that while he might be able to outsmart the Justice League, he still cannot get over a high school grudge involving buttercream frosting.

If you ever feel like your enemies are out to get you, just be glad they aren't trying to leave you cake-less.

### Superman's Glasses Are Hypnotic

(<https://dc.fandom.com/wiki/Hypno-Glasses>)

### Superman's Glasses Are Hypnotic.

The most famous secret identity in history relies entirely on the hope that no one in Metropolis has ever seen a pair of glasses before.

For nearly a century, people have mocked the idea that Lois Lane

([https://dc.fandom.com/wiki/Lois\\_Lane\\_\(Earth-One\)](https://dc.fandom.com/wiki/Lois_Lane_(Earth-One))), a woman who wins awards for finding hidden truths, cannot recognize the man ([https://dc.fandom.com/wiki/Kal-El\\_\(Earth-One\)](https://dc.fandom.com/wiki/Kal-El_(Earth-One))) she dates just because he slumps his shoulders.

Fans used to joke that the glasses must be enchanted or that Superman was using some kind of low-budget Jedi mind trick to keep people from connecting the dots.

Then 1978 rolled around, and the writers decided to make the "magic glasses" theory a terrifying biological reality in Superman #330

([https://dc.fandom.com/wiki/Superman\\_Vol\\_1\\_330](https://dc.fandom.com/wiki/Superman_Vol_1_330)).

They revealed that Clark's lenses were carved from the windshield of his Kryptonian escape pod ([https://dc.fandom.com/wiki/Kryptonian\\_Rocket](https://dc.fandom.com/wiki/Kryptonian_Rocket)), which somehow amplifies a constant, subconscious hypnotic beam coming out of his eyeballs.

This beam makes everyone who looks at him see a completely different person, turning the muscular Man of Steel into a frail, aging office worker with a bad posture.

(Add this <https://readcomiconline.li/Comic/Superman-1939/Issue-330?id=16167>)

On top of that, it basically means Superman is basically gaslighting the entire world every second of the day just so he can have a desk job and health insurance.

Grant Morrison later refined this by saying it was a mix of master-level acting and subtle muscle manipulation, but the hypnosis part stayed in the mix.

It is comforting to know that Superman's greatest power isn't flight or strength, **but the ability to make his coworkers hallucinate.**

## **The Retcon Punch**

### **The Retcon Punch.**

Reality in the DC Universe used to be held together by little more than hope... **and some very stressed-out staples until the editors decided to blame a literal temper tantrum.**

For decades, the timeline was a complete mess of ghosts, disappearing sidekicks, and origins that shifted like sand, leading fans to assume the writing staff was just hitting the tequila a bit too hard on Tuesday afternoons.

Everyone called the "editorial incompetence" theory the most logical one because it assumed humans make mistakes, but the 2005 event Infinite Crisis

([https://dc.fandom.com/wiki/Infinite\\_Crisis](https://dc.fandom.com/wiki/Infinite_Crisis)) arrived and proved to everyone that DC's editorials are indeed lazy and incompetence to the point where they actually tripped down on it.

It starts out when Superboy-Prime ([https://dc.fandom.com/wiki/Kal-El\\_\(Earth-Prime\)](https://dc.fandom.com/wiki/Kal-El_(Earth-Prime))) was trapped in a golden "paradise dimension" watching the main timeline turn into a dark, gritty soap opera, and he was so annoyed by the lack of heroism that he started punching the literal walls of space-time.

BUT WE HAVE  
LEARNED THAT  
TIME IS MORE  
FLUID THAN  
BELIEVED.

THAT THE ANGER  
AND FRUSTRATION  
OF A POWERFUL BOY  
TRAPPED BETWEEN  
HIS EXISTENCE AND  
NOTHINGNESS...

...COULD CHANGE  
THE WORLD THAT  
WE KNOW.

WITH EACH FIT  
OF RAGE, HIS FIST  
COLLIDING WITH  
THE WALL OF  
HIS PROVERBIAL  
CELL...

(Superboy-Prime punching the walls of space-time

<https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

Each time his teenage fist hit the barrier of reality, the shockwaves traveled back through history, causing Jason Todd to sit up in his grave and the Doom Patrol

([https://dc.fandom.com/wiki/Doom\\_Patrol\\_\(New\\_Earth\)](https://dc.fandom.com/wiki/Doom_Patrol_(New_Earth))) to forget their own birthdays.

(Jason Todd out of his grave

<https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

It is the laziest meta-fix because it suggests that every single plot hole you have ever complained about was actually caused by a cosmic bully having a mid-life crisis before he even hit twenty.

On top of that, I would even say that it means the fabric of existence is essentially as fragile as drywall in a frat house.

The next time you find a continuity error, **just assume a Kryptonian teenager is currently working through some big feelings nearby.**

**There Is More Than One Joker**

[https://dc.fandom.com/wiki/Joker\\_\(Prime\\_Earth\)\)](https://dc.fandom.com/wiki/Joker_(Prime_Earth)))

### **There Is More Than One Joker.**

Trying to track the Joker's personality is like trying to nail jelly to a moving train, which led some fans to suspect there was more than one clown in the kitchen.

Over the years, the Joker went from a grim mobster to a goofy prankster and finally to a face-cutting nihilist, prompting the theory that the name was just a brand passed down between different psychos.

Most people dismissed this as a way to ignore the fact that different writers have different tastes in humor, but the Darkseid War

[https://dc.fandom.com/wiki/Justice\\_League:\\_The\\_Darkseid\\_War](https://dc.fandom.com/wiki/Justice_League:_The_Darkseid_War) event decided to make the math literal.

When Batman sat on the Mobius Chair, a cosmic throne that knows everything in the universe, he asked for the Joker's name and was told there were actually three of them.

(Batman sitting on Mobius chair

<https://readcomiconline.li/Comic/Justice-League/Issue-42?id=18515>)

(Batman revealing there are three Jokers

<https://readcomiconline.li/Comic/Justice-League/Issue-50?id=55448>)

This led to a whole miniseries ([https://dc.fandom.com/wiki/Batman: Three Jokers Vol 1](https://dc.fandom.com/wiki/Batman:_Three_Jokers_Vol_1)) where Batman had to hunt down "The Criminal," "The Clown," and "The Comedian," who had been working together to keep the Bat-mythos fresh and terrifying.

(From left to right: The Criminal, The Clown, The Comedian

<https://readcomiconline.li/Comic/Batman-Three-Jokers/Issue-1?id=175017>)

What I think makes it even crazier is that they were actually trying to "cook" a fourth, even better Joker, **because apparently, three mass-murdering mimes just weren't enough for Gotham's ecosystem.**

It turns out the Joker's inconsistent backstory isn't because he's a liar, but because he's actually a small franchise of independent contractors sharing a single wardrobe.

It is good to know that Batman isn't just failing to catch one guy, **but is actually failing to catch an entire small business of lunatics.**

**Doctor Manhattan Created the New 52 Reboot**

[https://dc.fandom.com/wiki/The\\_New\\_52](https://dc.fandom.com/wiki/The_New_52))

**Doctor Manhattan Created the New 52 Reboot.**

The 2011 "New 52" reboot was so widely disliked for its cold and cynical tone that fans started blaming a literal lack of humanity for the editorial decisions.

When DC wiped away marriages, erased fan-favorite characters, and made everyone wear excessive amounts of body armor, the joke was that an unfeeling robot must have designed the new universe.

Some readers pointed the finger at Dr. Manhattan

[https://dc.fandom.com/wiki/Jonathan\\_Osterman\\_\(Watchmen\)](https://dc.fandom.com/wiki/Jonathan_Osterman_(Watchmen))) from the Watchmen

<https://dc.fandom.com/wiki/Watchmen>) series, mostly because he is the poster boy for being a blue, naked guy who doesn't understand why people like hugs.

What started as a meta-complaint about the "death of hope" in comics turned into the actual plot of the DC Rebirth era.

It was revealed that Dr. Manhattan had been hiding in the shadows, literally reaching into the timeline to steal ten years of history and love because he wanted to see what would happen to the heroes.

He was essentially a cosmic scientist treating the Justice League like a bunch of ants in a jar, **which explains why everyone was so grumpy for a solid five years.**

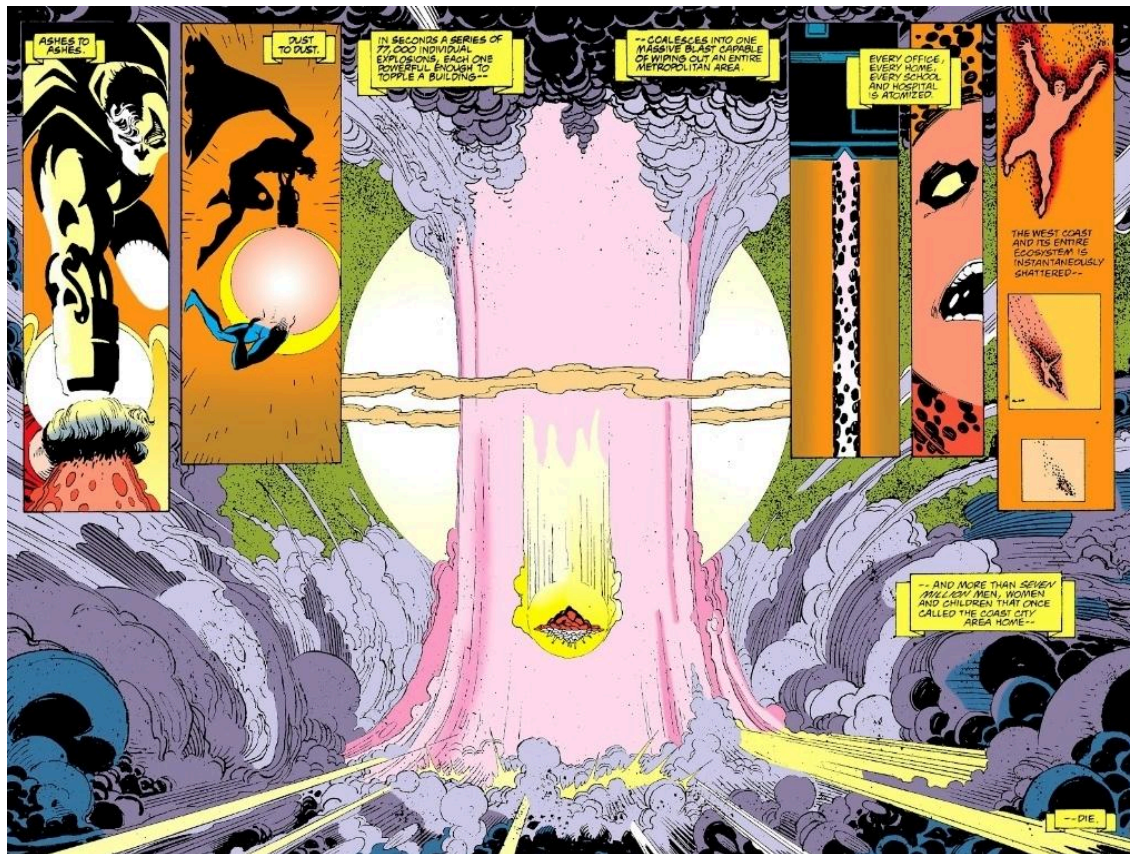

On top of that, it turned the fans' hatred of the reboot into a canonical plot point where the characters themselves were mad about the missing years.  
It turns out that when your favorite character gets a divorce, it might not be the writer's fault, but the fault of a god-like nudist from another dimension.

### Hal Jordan Was Possessed

([https://dc.fandom.com/wiki/Hal\\_Jordan\\_\(New\\_Earth\)](https://dc.fandom.com/wiki/Hal_Jordan_(New_Earth)))

### Hal Jordan Was Possessed.

Back in the nineties ([https://dc.fandom.com/wiki/Green\\_Lantern:\\_Emerald\\_Twilight](https://dc.fandom.com/wiki/Green_Lantern:_Emerald_Twilight)), Hal Jordan went from being a brave space cop to a genocidal maniac who murdered his entire organization, and his fans simply refused to believe he did it on purpose.  
After Coast City ([https://dc.fandom.com/wiki/Coast\\_City](https://dc.fandom.com/wiki/Coast_City)) was destroyed, Hal snapped, killed the other Green Lanterns, and tried to rewrite history, which the writers presented as a tragic story of a hero falling from grace.

(Coast City destroyed <https://readcomiconline.li/Comic/Superman-1987/Issue-80?id=16743>)

(Killing the other Green Lanterns

<https://readcomiconline.li/Comic/Green-Lantern-1990/Issue-49?id=4205>)

Hal fans were so desperate to save his reputation that they claimed he must have been mind-controlled by a "fear bug" or a space parasite, a theory that was mocked for being a cheap cop-out.

Then Geoff Johns stepped in to save the day by revealing that Parallax

([https://dc.fandom.com/wiki/Parallax\\_\(New\\_Earth\)](https://dc.fandom.com/wiki/Parallax_(New_Earth))) wasn't just Hal's new villain name, but a literal yellow space flea that had been living inside the Lantern battery for millions of years. This parasite had jumped into Hal's brain and was driving his body like a stolen car during the entire massacre, meaning Hal was technically innocent of all charges.

This retcon was so successful it didn't just fix Hal's character; it created a whole mythology of emotional entities that now dominates the Green Lantern corner of the universe.

It is a classic case of a fan theory being so useful for corporate branding that it became the foundation of a billion-dollar comic book franchise.

Now, whenever a Green Lantern does something terrible, they can just blame the nearest glowing insect and call it a day.

**Batman Has a Backup Personality**

([https://dc.fandom.com/wiki/Tlano\\_\(Earth-One\)](https://dc.fandom.com/wiki/Tlano_(Earth-One)))

<https://dc.fandom.com/wiki/Zur-En-Arrh>)

**Batman Has a Backup Personality.**

During the fifties, Batman went on a lot of weird trips that involved aliens and rainbow-colored costumes, which modern fans usually dismiss as the caped crusader having a very bad reaction to some Gotham city smog.

One of the strangest stories involved a "Batman of Zur-En-Arrh" from another planet who wore a purple, red, and yellow suit and had a bat-radia.

Most people assumed this was just a fever dream from an era when comics were written for five-year-olds on a sugar rush, but Grant Morrison decided that every single one of those stories had to be true.

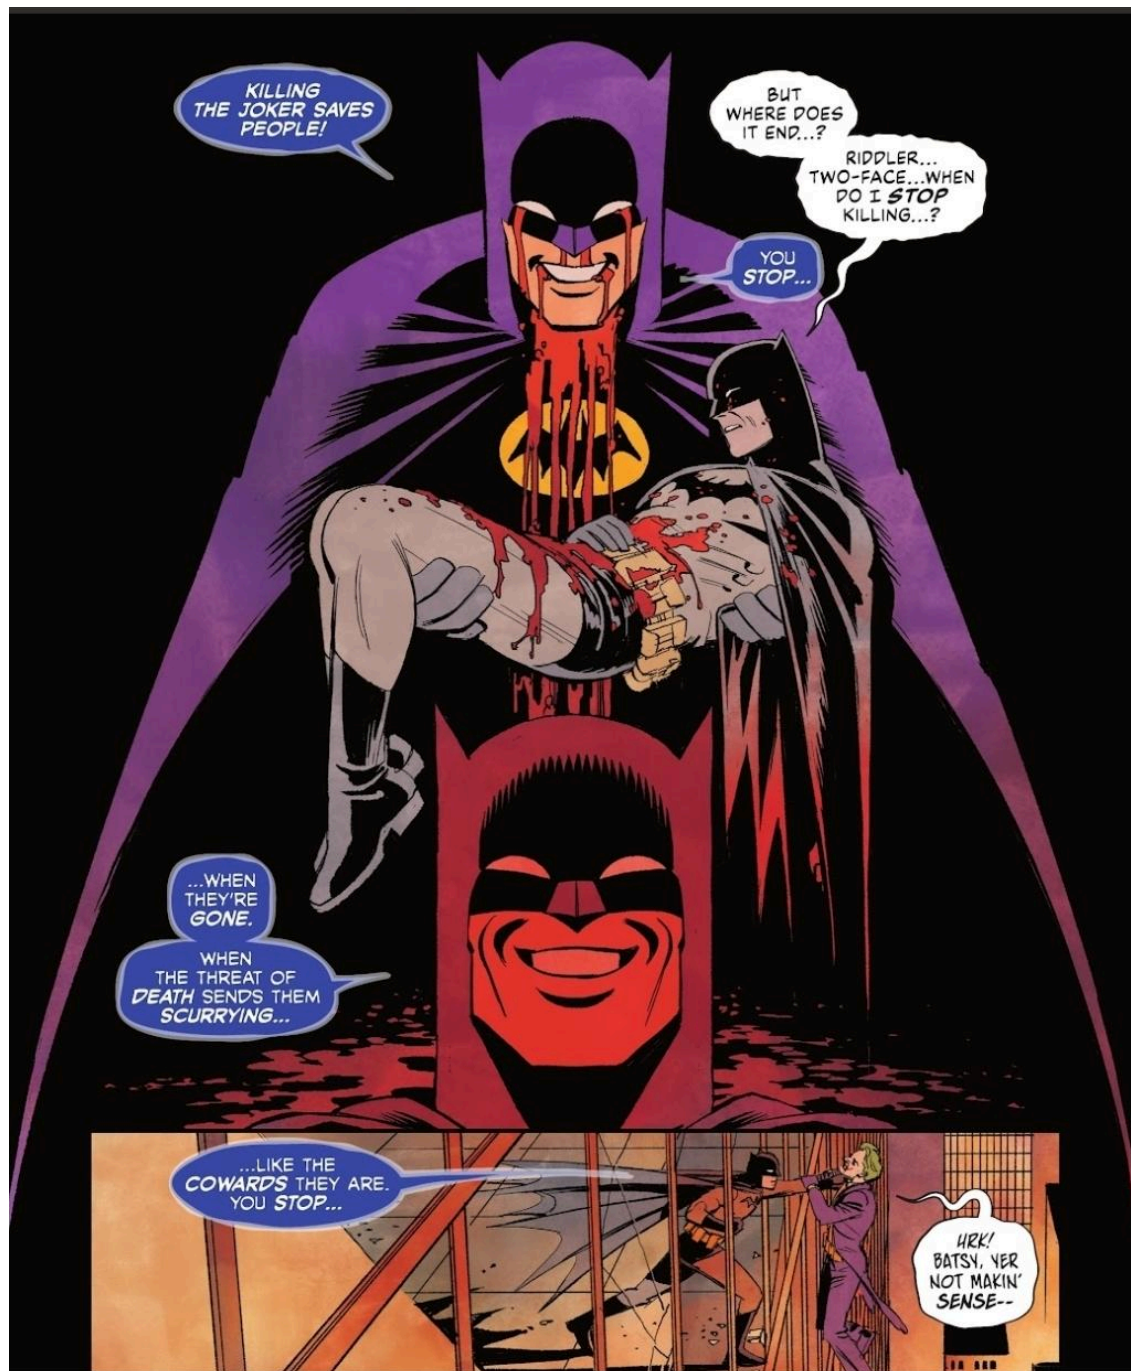

He recontextualized Zur-En-Arrh not as an alien world, but as a "backup personality" Bruce Wayne programmed into his own brain in case of a mental attack.

(Zur-En-Arrh in Batman's brain

[https://readcomiconline.li/Comic/Batman-2016/Issue-130?id=208866\)](https://readcomiconline.li/Comic/Batman-2016/Issue-130?id=208866)

When Bruce's primary mind is shut down by a villain, he enters a fugue state where he becomes a pure, unhinged version of Batman who thinks he is talking to a five-inch-tall Bat-Mite.

(Add this <https://readcomiconline.li/Comic/Batman-2016/Issue-130?id=208866>)

The garish colors of the suit were explained as the result of a sensory-overloaded mind trying to look intimidating while being completely detached from reality.

What makes it even crazier is that this "dumb" silver-age gag became one of the most intense and psychological stories in Batman's entire history.

It turns out that Batman is so prepared for everything that he even has a plan for when he finally loses his marbles.

**Guy Gardner's Personality**

([https://dc.fandom.com/wiki/Guy\\_Gardner\\_\(New\\_Earth\)\)](https://dc.fandom.com/wiki/Guy_Gardner_(New_Earth)))

### **Guy Gardner's Personality.**

Guy Gardner went from being the nicest guy in the world to being a total jerk who picks fights with everyone, and the reason is surprisingly simple and I would probably say medically concerning.

In his early appearances, Guy was a polite gym teacher who was the backup choice for the Green Lantern ring, but later he became the loudmouthed, obnoxious bully everyone loves to hate.

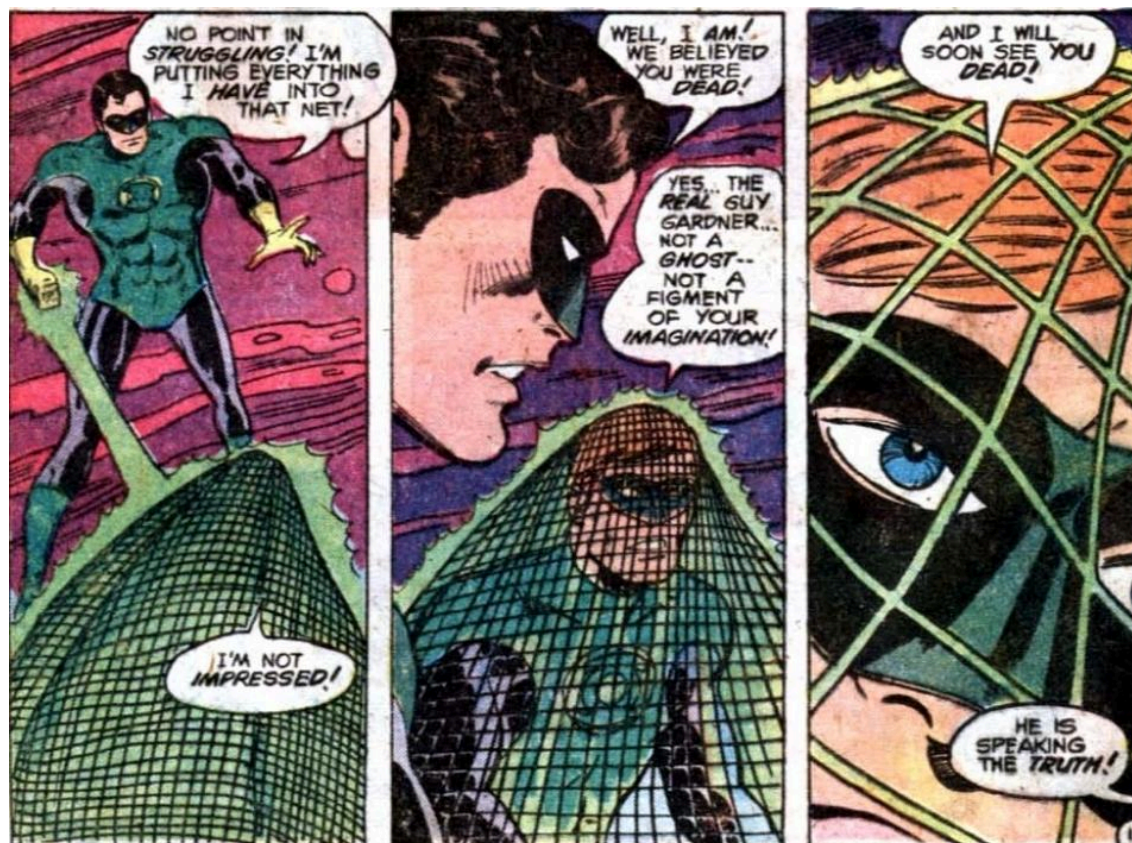

Fans assumed he just went crazy and forgot how to act, and the comics actually leaned into the idea adding a little detail that he had suffered a massive amount of head trauma.

Between being hit by a bus and spending time in the Phantom Zone ([https://dc.fandom.com/wiki/Phantom\\_Zone](https://dc.fandom.com/wiki/Phantom_Zone)), Guy's brain was essentially scrambled like a breakfast special.

(Hit by a bus <https://readcomiconline.li/Comic/Green-Lantern-1960/Issue-87?id=28308>)

(In the Phantom Zone

<https://readcomiconline.li/Comic/Green-Lantern-1960/Issue-122?id=28055>)

On top of that, a famous scene involved Batman punching Guy so hard that his personality actually reset to the "nice" version for a few issues until he bumped his head again.

(Knocked out by Batman

<https://readcomiconline.li/Comic/Justice-League-1987/Issue-5?id=63999>)

It turned his character arc into a literal "toggle switch" where his moral compass is entirely dependent on how recently he has been hit in the face.

This makes Guy Gardner the only superhero whose primary character development is actually just a very long, unmanaged concussion.

Though, I would say it is a bit dark when you realize the Justice League is basically just laughing at a man with a severe neurological condition every single day.

**Wonder Woman's Invisible Jet is Sentient**

[https://dc.fandom.com/wiki/Lansinarian\\_Morphing\\_Disk](https://dc.fandom.com/wiki/Lansinarian_Morphing_Disk))

**Wonder Woman's Invisible Jet is Sentient.**

Wonder Woman has a plane that you cannot see, **which is arguably the most useless invention for someone who can already fly through the air at supersonic speeds.**

For years, fans mocked the invisible jet as a weird relic of the past, joking that it must be a shapeshifting alien or a confused ghost because a mechanical invisible plane is a logistical nightmare.

If the plane is invisible, how does she find the keys, and why does it look like she is just sitting in a chair in the middle of the sky?

DC eventually decided to stop trying to explain the physics and just admitted the "dumb" theory was right: the jet is a sentient alien entity.

Specifically, it was revealed to be a "Morphing Disk" from an alien race called the Lansinarians (<https://dc.fandom.com/wiki/Lansinarians>) that can change its shape into anything Diana needs, **including a very transparent Boeing seven-forty-seven that can survive the Bermuda Triangle.**

It has its own consciousness and a deep emotional bond with Wonder Woman, meaning she isn't just flying a vehicle; she is hanging out with a very quiet, translucent friend.

(Deep bond with Diana

<https://readcomiconline.li/Comic/Wonder-Woman-1987/Issue-201?id=7159>)

What makes it even crazier is that the jet has sacrificed its own life to save her, **which means that it has more heart than most actual human characters.**

(Sacrificing himself

<https://readcomiconline.li/Comic/Wonder-Woman-1987/Issue-201?id=7159>)

It turns out that having an invisible plane makes a lot more sense when the plane is actually a loyal alien pet that likes to pretend it's a jet engine.

**Batman Plans to Kill the Justice League**

[https://dc.fandom.com/wiki/Bruce\\_Wayne\\_\(New\\_Earth\)](https://dc.fandom.com/wiki/Bruce_Wayne_(New_Earth))

**Batman Plans to Kill the Justice League.**

The idea that Batman is secretly planning to murder all of his friends sounds like something a tinfoil-hat conspiracy theorist would post on a forum, **but it turns out Bruce Wayne is just that paranoid.**

For years, fans debated how Batman could possibly survive a fight with the Justice League, assuming he must have some secret files hidden away in the Bat-computer.

Critics said this was "dumb" because it makes Batman a terrible friend who spends his nights thinking of ways to set his coworkers on fire.

Then the story Tower of Babel ([https://dc.fandom.com/wiki/JLA:\\_Tower\\_of\\_Babel](https://dc.fandom.com/wiki/JLA:_Tower_of_Babel)) came out and confirmed that Batman had indeed developed highly specific, terrifying ways to neutralize every single hero he works with.

He had a way to make Superman's skin transparent so his cells would overload with sun energy, and a way to make the Martian Manhunter burst into flames if he even thought about using his powers.

(Superman's skin transparent

<https://readcomiconline.li/Comic/JLA-1997/Issue-44?id=39307>)

(Martian Manhunter bursting into flames

<https://readcomiconline.li/Comic/JLA-1997/Issue-43?id=39306>)

On top of that, these plans were so effective that when a villain called Ra's Al Ghul ([https://dc.fandom.com/wiki/Ra%27s\\_al\\_Ghul\\_\(New\\_Earth\)](https://dc.fandom.com/wiki/Ra%27s_al_Ghul_(New_Earth))) stole them, the Justice League was nearly wiped out in a single afternoon.

Batman's defense was basically that he was the only one smart enough to realize that a group of gods needs a leash, **which did not go over well at the next team meeting, so they kicked him out.**

It is nice to know that while Superman brings hope to the world, **Batman brings a suitcase full of specialized poison for everyone he knows.**

**Jason Todd Didn't Stay Dead**

([https://dc.fandom.com/wiki/Jason\\_Todd\\_\(Prime\\_Earth\)](https://dc.fandom.com/wiki/Jason_Todd_(Prime_Earth)))

**Jason Todd Didn't Stay Dead.**

When Jason Todd died in a telephone poll in 1988, everyone thought he was gone for good because **"only Bucky and Jason Todd stay dead,"** but fans never stopped hoping for a comeback.

(Jason dead <https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

For almost twenty years, the second Robin was the poster child for the consequences of Batman's failure, making his death one of the most sacred events in comic book history. However, some fans insisted that Jason was too cool to stay in the ground and that he was probably out there training to be a ninja or a secret agent.

This was widely seen as "dumb" wishful thinking that would ruin the emotional weight of Batman's greatest tragedy.

Then the Red Hood showed up in Gotham, and it turned out the fans were right all along: Jason had literally crawled out of his own grave.

(As Red Hood <https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

(Crawling out his grave <https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

The initial explanation was that Superboy-Prime punched reality so hard that Jason Todd simply popped back into existence inside his coffin and had to dig his way out with his bare fingers.

BUT WE HAVE  
LEARNED THAT  
TIME IS MORE  
FLUID THAN  
BELIEVED.

THAT THE ANGER  
AND FRUSTRATION  
OF A POWERFUL BOY  
TRAPPED BETWEEN  
HIS EXISTENCE AND  
NOTHINGNESS...

...COULD CHANGE  
THE WORLD THAT  
WE KNOW.

WITH EACH FIT  
OF RAGE, HIS FIST  
COLLIDING WITH  
THE WALL OF  
HIS PROVERBIAL  
CELL...

(Superboy-Prime punching reality

<https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

On top of that, he was naturally very upset that Batman hadn't killed the Joker in revenge, leading to a massive family feud involving guns and crowbars.

(Finding out Batman didn't kill the Joker

<https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

(Feud with Batman <https://readcomiconline.li/Comic/Batman-1940/Annual-25?id=48585>)

It turns out that in the DC Universe, a tombstone is really just a suggestion if someone in another dimension is having a bad day.

### **Batman is an Arkham Asylum Patient**

([https://dc.fandom.com/wiki/Bruce\\_Wayne\\_\(Last\\_Knight\\_on\\_Earth\)\)](https://dc.fandom.com/wiki/Bruce_Wayne_(Last_Knight_on_Earth))))

### **Batman is an Arkham Asylum Patient.**

The "Arkham Asylum" theory is the ultimate creepy-pasta trope, suggesting that Bruce Wayne is just a crazy person in a padded cell imagining his entire life as a superhero.

In this version, the Joker ([https://dc.fandom.com/wiki/Joker\\_\(Last\\_Knight\\_on\\_Earth\)](https://dc.fandom.com/wiki/Joker_(Last_Knight_on_Earth))) is just a doctor who laughs at him, and the Batmobile is just a bed on wheels he uses to scoot around the hallway.

Fans usually hate this theory because it's a lazy way to deconstruct a story, but Scott Snyder decided to give the fans exactly what they asked for in Batman: Last Knight on Earth ([https://dc.fandom.com/wiki/Batman:\\_Last\\_Knight\\_on\\_Earth\\_Vol\\_1](https://dc.fandom.com/wiki/Batman:_Last_Knight_on_Earth_Vol_1)).

The comic starts with a young Bruce Wayne waking up in a straightjacket, being told by Doctor Alfred Pennyworth that he has been in a coma for years after murdering his parents.

(Add this <https://readcomiconline.li/Comic/Batman-Last-Knight-On-Earth/Issue-1?id=156119>)

For several pages, the book makes a very compelling case that Batman was never real and that the "rogues' gallery" are just the other patients in the ward.

What makes it even crazier is how well the theory fits the facts, making Bruce, and the reader, genuinely question if they have been hallucinating for eighty years.

It eventually turns out to be a complex ruse, but for a moment, DC officially validated the idea that Batman might just be the most successful mental patient in history.

### **Batman is a Metahuman**

([https://dc.fandom.com/wiki/Batman\\_\(Bruce\\_Wayne\)](https://dc.fandom.com/wiki/Batman_(Bruce_Wayne)))

**Batman is a Metahuman.**

Everyone knows Batman doesn't have superpowers, but if you look at his medical records, it's pretty clear he stopped being "just a guy" a long time ago.

Fans have spent decades pointing out that a normal human cannot dodge machine-gun fire, kick a motorcycle in half, or fall from the moon and survive with just a few bruises.

The theory that Batman is a "closet metahuman" was considered a "dumb" attempt to take away his peak-human status, but DC has finally started to admit the truth in the fine print.

In recent Suicide Squad comics ([https://dc.fandom.com/wiki/Suicide\\_Squad\\_Vol\\_5\\_22](https://dc.fandom.com/wiki/Suicide_Squad_Vol_5_22)), Amanda Waller's official government files literally list Batman as a metahuman, because from a government perspective, a man who does what he does isn't humanly possible.

(Amanda reveals Batman is a metahuman

<https://readcomiconline.li/Comic/Suicide-Squad-2016/Issue-22?id=118002>)

On top of that, the Dark Nights: Metal ([https://dc.fandom.com/wiki/Dark\\_Nights:\\_Metal](https://dc.fandom.com/wiki/Dark_Nights:_Metal)) event revealed that Bruce has been exposed to so many mystical chemicals and regenerative metals that his body has basically been upgraded to version two-point-zero.

(Exposed to chemicals

<https://readcomiconline.li/Comic/Dark-Nights-Metal/Issue-2?id=121381>)

He heals from broken bones in a matter of days and has the stamina of a marathon runner who also happens to be a freight train.

It turns out the "peak human" label is just a very clever marketing campaign to make the rest of us feel bad about our gym habits.

That's why I think it is comforting to know that Batman isn't just better than you because he works hard, but because he's also technically a biological anomaly with a very high tolerance for toxic waste.

### Outro
